Thanks Kris.

The last potential project discussed with the management of the alumina piles. Maybe Jeff is aware but I'm not sure if that project idea ever went anywhere with TriStar. I recall, for that idea, Jeff had estimated the cost of off-site disposal, which was in the several hundreds of thousands of dollars. Jeff and I had also considered the prospect of creating an on-site repository for the alumina, which I'm anticipating would be much less costly. If you ever had any discussions with TriStar about this project area, we can start any additional brainstorming from there.

Subject: BFPPA and TriStar

Hi Jeff and Brooks,

I sent the draft BFPPA to TriStar's attorney today, and we have a call scheduled on Monday (5/18) that DOJ will join as well. If you have any thoughts about potential projects – given the progress being made on the AMs – please let me know before then. If you're still in brainstorming mode, that's ok too.

Take care,
Kris
